Re: ODSA Proposed Groundwater Recovery  
System Rehabilitation and In-situ  
Treatment Evaluation and Design

Dear Mr. Adkins:

The Georgia Environmental Protection Division (EPD) has reviewed the proposed activities for the Old Drum Storage Area (ODSA) as described in the document received on July 2, 2013, for the Waycross facility. EPD finds the proposed actions acceptable and looks forward to a Work Plan for additional remedial actions based on the derived information.

It should be noted that EPD does not consider that these activities require a modification of the Corrective Action Plan referenced in the current facility permit HW-049(D).

Should you have any questions or comments, please contact Tom Brodell or Allison Keefer at 404-656-7802.

Sincerely,

Jim McNamara  
Unit Coordinator  
Remedial Sites Unit 1
